

Hassan El-Amin

DevOps Engineer

Cairo, Egypt | hassan.elamin@example.com | +20 1000 000000 | linkedin.com/in/hassan-elamin | github.com/hassan-elamin | hassan-elamin.dev

PROFILE

Results-driven DevOps Engineer with over 7 years of experience in automating deployment and infrastructure management. Expertise in CI/CD pipelines, cloud services, and container orchestration.

SKILLS

Languages: Bash, Python, Go

Frameworks: Ansible, Docker, Kubernetes

Cloud and tools: AWS, Azure, Google Cloud

Databases: PostgreSQL, Cassandra

Practices: Infrastructure as Code, Continuous Deployment, Monitoring and Logging

EXPERIENCE

Senior DevOps Engineer, Cloud Services LLC

Jan 2021 - Present

Cairo, Egypt

- Designed CI/CD pipelines that reduced deployment time by 60%.
- Managed cloud infrastructure using AWS, ensuring high availability and scalability.
- Implemented monitoring solutions using Prometheus and Grafana, improving incident response times.

Technologies: AWS, Docker, Ansible

DevOps Engineer, Tech Corp

May 2016 - Dec 2020

Cairo, Egypt

- Automated configuration management using Ansible, reducing manual intervention by 80%.
- Collaborated with development teams to improve application deployment processes.
- Conducted training sessions on best practices for cloud security and infrastructure management.

Technologies: Python, Kubernetes, PostgreSQL

PROJECTS

Container Orchestration System

Developed a container orchestration system using Kubernetes to streamline application deployment and scaling.

Technologies: Kubernetes, Docker.

Infrastructure Automation Project

Led the initiative to automate infrastructure setup using Terraform, improving deployment consistency and speed.

Technologies: Terraform, AWS.

EDUCATION AND CERTIFICATIONS

BSc Computer Engineering, Cairo University (2015) - Specialized in network and systems engineering.

Certifications: Certified Kubernetes Administrator
