

Akira Tanaka

DevOps Engineer

Tokyo, Japan | akira.tanaka@example.com | +81 3-9000-0000 | linkedin.com/in/akira-tanaka | github.com/akira-tanaka | akira-tanaka.dev

PROFILE

Results-oriented DevOps Engineer with 6 years of experience in automating and optimizing deployments. Skilled in leveraging cloud technologies and CI/CD practices to enhance system reliability and speed.

SKILLS

Languages: Bash, Python, Groovy
Frameworks: Kubernetes, Jenkins, Terraform
Cloud and tools: AWS, GCP, Azure
Databases: Oracle, Redis
Practices: Infrastructure as Code, Continuous Integration, Monitoring

EXPERIENCE

DevOps Engineer, Cloud Nexus Mar 2021 - Present

Tokyo, Japan

- Automated deployment pipelines using Jenkins, reducing deployment time by 40%.
- Developed infrastructure as code using Terraform to ensure consistent environment configurations.
- Implemented monitoring solutions using Prometheus to enhance system visibility.

Technologies: AWS, Jenkins, Kubernetes

Systems Administrator, Techwave Solutions

May 2017 - Feb 2021

Tokyo, Japan

- Managed server infrastructure, ensuring high availability and security.
- Executed regular backups and recovery processes, maintaining data integrity.
- Reduced system downtime by implementing proactive monitoring strategies.

Technologies: Linux, Oracle, Bash

PROJECTS

CI/CD Pipeline Implementation

Designed and implemented a CI/CD pipeline that streamlined code integration, leading to faster release cycles. Technologies: Jenkins, Docker.

Infrastructure Migration to AWS

Led the migration of on-premise infrastructure to AWS, resulting in a 50% reduction in operational costs. Technologies: AWS, Terraform.

EDUCATION AND CERTIFICATIONS

BSc Information Technology, Fictional University of Tokyo (2016) - Specialized in network and systems administration.

Certifications: AWS Certified DevOps Engineer - Professional
