

Olivia Schneider

DevOps Engineer

Berlin, Germany | olivia.schneider@example.com | +49 30 0000 0003 | linkedin.com/in/olivia-schneider | github.com/olivia-schneider | olivia-schneider.dev

PROFILE

Results-driven DevOps Engineer with over 6 years of experience in automating and optimizing mission-critical deployments in cloud environments.

SKILLS

Languages: Bash, Python, Go

Frameworks: Ansible, Terraform, Docker

Cloud and tools: AWS, Azure, Google Cloud

Databases: MySQL, Cassandra

Practices: Continuous Integration, Infrastructure as Code, Site Reliability Engineering

EXPERIENCE

Senior DevOps Engineer, CloudOps

May 2018 - Present

Berlin, Germany

- Spearheaded the implementation of an Infrastructure as Code strategy using Terraform, reducing provisioning time by 50%.
- Automated deployment pipelines with Jenkins and Docker, improving deployment frequency by over 70%.
- Developed monitoring solutions for cloud infrastructure, increasing uptime to 99.9%.

Technologies: Terraform, AWS, Jenkins

Junior DevOps Engineer, Tech Dynamics

Jan 2016 - Apr 2018

Berlin, Germany

- Assisted in managing cloud infrastructures on AWS, achieving significant cost savings through resource optimization.
- Collaborated with development teams to streamline code integration and delivery processes.
- Created documentation for operational procedures and best practices.

Technologies: AWS, Docker, Ansible

PROJECTS

Automated CI/CD Pipeline

Designed and implemented a CI/CD pipeline that reduced software release cycles from weeks to days, increasing productivity.

Technologies: Jenkins, Docker, Terraform.

Server Monitoring System

Developed a real-time server monitoring system with alerting capabilities, reducing incident response time. *Technologies:*

Prometheus, Grafana, Python.

EDUCATION AND CERTIFICATIONS

BSc Computer Engineering, Technische Universität Berlin (2016) - Focus on Software Development.

Certifications: AWS Certified DevOps Engineer
