

Leonardo Grimaldi

DevOps Engineer

Rome, Italy | leonardo.grimaldi@example.com | +39 600 000000 | linkedin.com/in/leonardo-grimaldi | github.com/leonardo-grimaldi | leonardog.dev

PROFILE

Skilled DevOps Engineer with over 6 years of experience in automating and optimizing complex workflows. Strong background in cloud infrastructure, CI/CD pipelines, and system monitoring.

SKILLS

Languages: Python, Bash, Java

Frameworks: Ansible, Terraform, Kubernetes

Cloud and tools: AWS, Azure, GCP

Databases: Cassandra, Redis

Practices: Infrastructure as Code, Continuous Delivery, Site Reliability Engineering

EXPERIENCE

Senior DevOps Engineer, Cloud Innovations Ltd.

Mar 2019 - Present

Milan, Italy

- Implemented CI/CD pipelines using Jenkins, reducing deployment times by 60%.
- Automated infrastructure provisioning using Terraform, resulting in improved consistency across environments.
- Monitored and optimized cloud costs, saving the company 30% on cloud infrastructure.

Technologies: AWS, Kubernetes, Ansible

DevOps Engineer, Dynamic Systems Corp.

Jan 2017 - Feb 2019

Florence, Italy

- Developed deployment scripts for multiple applications, significantly reducing manual intervention.
- Implemented monitoring solutions using Prometheus and Grafana, enhancing system reliability.
- Collaborated with development teams to improve release cycles and application performance.

Technologies: Docker, Git, Prometheus

PROJECTS

Infrastructure Automation Project

Led a project that automated the deployment of cloud infrastructure, resulting in a faster and more reliable rollout of applications. Technologies: Terraform, AWS.

Monitoring Dashboard

Created a centralized monitoring dashboard for applications, which allowed real-time insights into performance and uptime. Technologies: Grafana, Prometheus.

EDUCATION AND CERTIFICATIONS

MSc Computer Engineering, Fictional University of Technology (2016) - Specialized in Cloud Computing

Certifications: AWS Certified DevOps Engineer - Professional
