PROFILE

Analytical Data Scientist with extensive experience in predictive modeling and statistical analysis. Passionate about transforming data into actionable insights to drive business success. Proficient in machine learning algorithms and data visualization tools.

SKILLS

Languages: Python, R, SQL

Frameworks: TensorFlow, Scikit-learn, Pandas

Cloud and tools: AWS, Google Cloud Platform, Azure ML

Databases: PostgreSQL, Oracle

Practices: Data-driven decision making, Agile methodologies, Exploratory data analysis

EXPERIENCE

Data Scientist, Data Insights Co.

May 2021 - Present

Toronto, Canada

- Developed predictive models that increased sales forecasting accuracy by 20%.
- Conducted data analysis and visualization for quarterly business reviews.
- Collaborated with cross-functional teams to understand data requirements and deliver solutions.

Technologies: Python, AWS, Tableau

Data Analyst, Tech Analytics Group

Jan 2019 - Apr 2021

Toronto, Canada

- Analyzed large datasets to identify trends and insights, which improved operational efficiency by 15%.
- Created dashboards and reports using Tableau for senior management.
- Collaborated with IT teams to ensure data integrity and accuracy.

Technologies: SQL, Tableau, Excel

PROJECTS

Customer Churn Prediction

Designed a machine learning model to predict customer churn, leading to targeted retention strategies that decreased churn rates by 30%. Technologies: Python, Scikit-learn, AWS.

Sales Dashboard

Developed an interactive sales dashboard using Tableau to visualize key performance indicators in real-time. Technologies: Tableau, SQL, Python.

EDUCATION AND CERTIFICATIONS

MSc Data Science, University of Toronto (2020)

Certifications: Certified Data Scientist
