

Jin Park

Cloud Security Engineer

Seoul, South Korea | jin.park@example.com | +82 2-000-0000 | linkedin.com/in/jin-park | github.com/jin-park | jinparksecurity.com

PROFILE

Skilled Cloud Security Engineer with over 6 years of experience in securing cloud infrastructures and ensuring compliance with security standards. Proficient in threat modeling, vulnerability assessments, and incident response.

SKILLS

Languages: Python, Java, Bash

Frameworks: Flask, Spring, Express

Cloud and tools: AWS, GCP, Azure

Databases: MongoDB, Cassandra

Practices: DevSecOps, Continuous monitoring, Vulnerability management

EXPERIENCE

Cloud Security Engineer, SecureCloud Solutions

Jan 2021 - Present

Seoul, South Korea

- Implemented security best practices for AWS cloud environments, reducing security incidents by 40%.
- Conducted penetration testing and vulnerability assessments to identify security weaknesses.
- Developed automated security monitoring scripts to enhance incident response time.

Technologies: AWS, Python, Terraform

Security Analyst, CyberGuard Technologies

Mar 2017 - Dec 2020

Busan, South Korea

- Analyzed security incidents and provided remediation strategies to mitigate risks.
- Collaborated with IT teams to implement security controls and compliance measures.
- Prepared security reports for upper management and clients.

Technologies: Java, AWS, Cassandra

PROJECTS

Cloud Security Framework

Designed and implemented a comprehensive security framework for AWS environments, ensuring compliance with industry standards. Technologies: AWS, Python.

Automated Incident Response System

Developed a system to automate incident response procedures, significantly improving response times and reducing manual effort. Technologies: Bash, Terraform.

EDUCATION AND CERTIFICATIONS

BSc Cybersecurity, Seoul National University (2016) - Graduated with distinction.

Certifications: Certified Cloud Security Professional (CCSP)
