

Mira Joshi

Data Engineer

Bangalore, India | mira.joshi@example.com | +91 8000 000000 | linkedin.com/in/mira-joshi | github.com/mira-joshi | mirajoshi.dev

PROFILE

Data Engineer with over 5 years of experience in building data pipelines and large-scale data processing. Proficient in various data technologies and committed to the highest coding standards and best practices.

SKILLS

Languages: Python, Java, SQL

Frameworks: Apache Spark, Hadoop, Flask

Cloud and tools: AWS, Google Cloud, Azure

Databases: MySQL, MongoDB

Practices: Agile methodology, ETL processes, Data warehousing

EXPERIENCE

Senior Data Engineer, Data Solutions Inc.

Jan 2020 - Present

Bangalore, India

- Designed and implemented ETL pipelines using Apache Spark, increasing data processing efficiency by 30%.
- Led a team of 4 engineers in developing a real-time data ingestion system with AWS Kinesis.
- Optimized query performance on large datasets in MySQL, resulting in 50% faster report generation.

Technologies: Python, Apache Spark, AWS

Data Engineer, CloudTech Analytics

Jun 2018 - Dec 2019

Bangalore, India

- Implemented data pipelines for a reporting platform using AWS Glue and Redshift.
- Collaborated with data scientists to enhance data models, improving predictive accuracy by 25%.
- Automated data validation processes, reducing errors by 40%.

Technologies: AWS, Redshift, Python

PROJECTS

Real-Time Analytics Dashboard

Developed a dashboard for real-time analytics using Flask and AWS services, providing insights into user behavior.

Technologies: Flask, AWS, JavaScript.

Data Warehousing Solution

Built a scalable data warehousing solution with Snowflake that reduced data retrieval times by 70%. *Technologies: Snowflake, Python, SQL.*

EDUCATION AND CERTIFICATIONS

MSc Data Science, Tech University (2017) - Focus on big data technologies and machine learning.

Certifications: AWS Certified Data Analytics - Specialty
