

Rafael de Souza

DevOps Engineer

São Paulo, Brazil | raphael.souza@example.com | +55 11 90000-0000 | linkedin.com/in/rafael-souza | github.com/rafael-souza | raphael.dev

PROFILE

Results-driven DevOps Engineer with 6+ years of experience in automating deployments and scaling cloud infrastructures. Strong expertise in CI/CD pipelines and container orchestration.

SKILLS

Languages: Python, Bash, Ruby

Frameworks: Kubernetes, Docker, Terraform

Cloud and tools: AWS, Google Cloud, Azure

Databases: PostgreSQL, Cassandra

Practices: Continuous integration, Infrastructure as code, Monitoring and logging

EXPERIENCE

Senior DevOps Engineer, CloudTech Solutions

Jun 2019 - Present

São Paulo, Brazil

- Designed and managed CI/CD pipelines, improving deployment frequency by 50%.
- Implemented Docker containers and Kubernetes for microservices architecture, enhancing scalability.
- Reduced server costs by 20% by optimizing cloud resource allocation.

Technologies: AWS, Docker, Kubernetes

DevOps Engineer, Innovatech

Jan 2017 - May 2019

São Paulo, Brazil

- Automated monitoring and logging solutions, leading to a 30% decrease in downtime.
- Collaborated with development teams to streamline application deployment processes.
- Conducted training sessions on best practices in DevOps methodologies.

Technologies: Python, Jenkins, Terraform

PROJECTS

Microservices Migration

Led a successful migration of legacy applications to microservices architecture on AWS, resulting in improved system performance and reduced maintenance costs. Technologies: AWS, Docker.

Automated Monitoring Solution

Developed an automated monitoring solution using Prometheus and Grafana, providing real-time metrics and alerts. Technologies: Grafana, Prometheus.

EDUCATION AND CERTIFICATIONS

BSc in Information Technology, University of São Paulo (2016) - Specialized in cloud computing and IT infrastructure.

Certifications: AWS Certified DevOps Engineer - Professional
