

Jasper van der Meer

DevOps Engineer

Amsterdam, Netherlands | jasper.vandermeer@example.com | +31 20 000 0000 | linkedin.com/in/jasper-van-der-meer | github.com/jasper-van-der-meer | jaspervandermeer.dev

PROFILE

DevOps Engineer with a strong background in automation, CI/CD, and cloud infrastructure. Passionate about streamlining operations and enhancing system performance through innovative solutions.

SKILLS

Languages: Bash, Python, Go

Frameworks: Ansible, Docker, Kubernetes

Cloud and tools: AWS, Google Cloud, Azure

Databases: MySQL, PostgreSQL

Practices: Infrastructure as Code, Continuous Delivery, Monitoring and logging

EXPERIENCE

DevOps Engineer, CloudOps Technology

Sep 2019 - Present

Amsterdam, Netherlands

- Automated deployment processes using Docker and Kubernetes, resulting in faster release cycles.
- Implemented monitoring solutions that improved system reliability and reduced downtime by 35%.
- Collaborated with development teams to integrate CI/CD pipelines using Jenkins.

Technologies: Kubernetes, AWS, Python

Junior DevOps Engineer, Tech Solutions Group

May 2017 - Aug 2019

Amsterdam, Netherlands

- Contributed to infrastructure management and automation using Ansible and Terraform.
- Assisted in the migration of applications to AWS, improving scalability and performance.
- Participated in troubleshooting and optimizing existing CI/CD workflows.

Technologies: Ansible, Terraform, Go

PROJECTS

Container Orchestration System

Developed a container orchestration system using Kubernetes, enhancing application deployment flexibility. Technologies: Kubernetes, Docker, AWS.

Automated Monitoring Tool

Created an automated monitoring tool that provided insights into system performance and resource utilization. Technologies: Python, AWS, Grafana.

EDUCATION AND CERTIFICATIONS

BSc Computer Engineering, Amsterdam Institute of Technology (2016) - Focused on cloud computing and distributed systems.

Certifications: Certified Kubernetes Administrator (CKA)
