

Haruto Saito

DevOps Engineer

Tokyo, Japan | haruto.saito@example.com | +81 3 9000 0000 | linkedin.com/in/haruto-saito | github.com/haruto-saito | harutosaito.dev

PROFILE

Skilled DevOps Engineer with 6 years of experience in automation and infrastructure management. Expertise in CI/CD pipelines and cloud services, with a strong focus on optimizing deployment processes and system performance.

SKILLS

Languages: Bash, Python, Go
Frameworks: Terraform, Ansible, Docker
Cloud and tools: AWS, Azure, Google Cloud
Databases: MySQL, MongoDB
Practices: Continuous Integration, Infrastructure as Code, Monitoring

EXPERIENCE

DevOps Engineer, CloudTech Solutions

Feb 2020 - Present

Tokyo, Japan

- Implemented CI/CD pipelines using Jenkins, reducing deployment time by 40%.
- Managed cloud infrastructure on AWS, ensuring high availability and security.
- Automated monitoring solutions that detected performance issues, improving system reliability.

Technologies: AWS, Docker, Jenkins

Site Reliability Engineer, NextGen Technologies

May 2017 - Jan 2020

Tokyo, Japan

- Developed scripts for automated system health checks, leading to reduced downtime by 30%.
- Collaborated with development teams to design scalable microservices architectures.
- Performed incident response and troubleshooting, improving mean time to recovery by 25%.

Technologies: Kubernetes, Python, Terraform

PROJECTS

Automated Deployment System

Designed an automated deployment system that reduced manual intervention, improving productivity by 50%. Technologies: Terraform, Ansible, AWS.

Monitoring Service Implementation

Implemented a comprehensive monitoring service utilizing Grafana and Prometheus, allowing for proactive incident management. Technologies: Grafana, Prometheus, Docker.

EDUCATION AND CERTIFICATIONS

BSc Computer Engineering, Tokyo Institute of Technology (2017)

Certifications: AWS Certified DevOps Engineer - Professional
