Dedicated Security Engineer with over 5 years of experience in safeguarding systems and networks. Adept at identifying vulnerabilities and implementing robust security measures to protect sensitive data.

## SKILLS

**Languages:** Python, Java, C

**Frameworks:** OWASP, Metasploit, Burp Suite

**Cloud and tools:** AWS, Azure, GCP

**Databases:** MySQL, Oracle

**Practices:** Penetration testing, Vulnerability assessment, Incident response

## EXPERIENCE

### Security Engineer, SecureTech Solutions

Jan 2021 - Present

Cairo, Egypt

- Conducted penetration tests and vulnerability assessments, identifying critical security gaps in client systems.
- Designed and implemented security policies and procedures that reduced security incidents by 30%.
- Collaborated with development teams to integrate security measures into the software development lifecycle.

*Technologies: Python, OWASP, AWS*

### Junior Security Analyst, CyberDefense Corp.

Jun 2018 - Dec 2020

Cairo, Egypt

- Monitored network traffic for security breaches, responding promptly to incidents and ensuring minimal impact.
- Assisted in the development of incident response plans and security awareness training for employees.
- Utilized tools like Wireshark and Splunk for threat analysis and reporting.

*Technologies: Java, MySQL, Metasploit*

## PROJECTS

### Security Policy Overhaul

Revamped security policies for a financial institution, leading to compliance with international standards and reduced risk exposure. Technologies: Python, AWS.

### Phishing Awareness Training Program

Developed and executed a phishing awareness program for employees, which decreased successful phishing attempts by 40%. Technologies: Java, Burp Suite.

## EDUCATION AND CERTIFICATIONS

BSc in Cybersecurity, Cairo University (2018) - Graduated with a focus on network security.

Certifications: Certified Information Systems Security Professional (CISSP)
