

Mateo Giordano

DevOps Engineer

Rome, Italy | mateo.giordano@example.com | +39 345 678 9012 | linkedin.com/in/mateo-giordano | github.com/mateo-giordano | mateogiordano.dev

PROFILE

Results-driven DevOps Engineer with 6 years of experience in automating and optimizing deployment processes. Adept at implementing CI/CD pipelines and infrastructure as code.

SKILLS

Languages: Bash, Python, Ruby
Frameworks: Terraform, Ansible, Docker
Cloud and tools: AWS, Azure, GCP
Databases: MySQL, DynamoDB
Practices: CI/CD, Infrastructure as Code, Monitoring and logging

EXPERIENCE

DevOps Engineer, Cloud Dynamics

Apr 2020 - Present

Rome, Italy

- Implemented CI/CD pipelines using Jenkins and GitLab CI, increasing deployment frequency by 25%.
- Configured and managed Kubernetes clusters, improving application scalability and reliability.
- Developed automation scripts to streamline server provisioning, reducing setup time by 50%.

Technologies: Docker, Kubernetes, AWS

Systems Administrator, Tech Solutions Inc.

Jun 2017 - Mar 2020

Milan, Italy

- Managed Linux servers and optimized performance, resulting in a 30% decrease in downtime.
- Automated backup and recovery processes, ensuring data integrity and availability.
- Provided technical support and training to teams, enhancing IT literacy across the organization.

Technologies: Linux, Ansible, MySQL

PROJECTS

Automated Deployment System

Developed an automated deployment system that reduced release times significantly, allowing for multiple daily deployments.
Technologies: Jenkins, Docker, Terraform.

Monitoring and Alerting Infrastructure

Created a real-time monitoring and alerting system, helping to identify issues before they impacted end users. *Technologies: Prometheus, Grafana, AWS.*

EDUCATION AND CERTIFICATIONS

BSc Information Technology, Fictional University of Rome (2016) - Graduated with distinction.

Certifications: Docker Certified Associate, AWS Certified DevOps Engineer - Professional
