

Yuki Tanaka

Cloud Security Engineer

Tokyo, Japan | yuki.tanaka@example.com | +81 90-0000-0000 | linkedin.com/in/yuki-tanaka | github.com/yuki-tanaka | yuki-tanaka.cloud

PROFILE

Highly skilled Cloud Security Engineer with over 6 years of experience in securing cloud infrastructures. Expertise in identifying vulnerabilities and implementing effective security measures.

SKILLS

Languages: Python, Bash, Java

Frameworks: AWS Security Framework, Azure Security Center, Terraform

Cloud and tools: AWS, Azure, GCP

Databases: DynamoDB, MongoDB

Practices: Risk assessment, Incident response, Compliance audits

EXPERIENCE

Cloud Security Engineer, SecureCloud Solutions

Jun 2019 - Present

Tokyo, Japan

- Implemented cloud security policies and procedures that decreased security incidents by 40%.
- Conducted vulnerability assessments and penetration tests to identify security weaknesses.
- Worked closely with DevOps teams to integrate security into CI/CD processes.

Technologies: AWS, Python, Terraform

Junior Security Analyst, CloudGuard Technologies

Feb 2017 - May 2019

Tokyo, Japan

- Assisted in the monitoring of security alerts and incident response for cloud environments.
- Performed risk assessments to ensure compliance with industry standards.
- Contributed to the development of security training for employees.

Technologies: Azure, Bash, DynamoDB

PROJECTS

Cloud Security Monitoring System

Developed a comprehensive monitoring system for cloud security that enabled real-time threat detection, improving response times to incidents. Technologies: AWS, Python, Terraform.

Security Compliance Automation Tool

Created a tool to automate compliance checks for cloud infrastructures, resulting in a 50% reduction in audit preparation time. Technologies: Terraform, GCP, Java.

EDUCATION AND CERTIFICATIONS

BSc Information Technology, Tokyo Institute of Technology (2016) - Focused on network security and cloud technologies.

Certifications: Certified Information Systems Security Professional (CISSP)
