

Clara Vasile

Data Scientist

Bucharest, Romania | clara.vasile@example.com | +40 7000 000002 | linkedin.com/in/clara-vasile | github.com/clara-vasile | claravasile.dev

PROFILE

Detail-oriented Data Scientist with 4 years of experience in predictive modeling and machine learning. Skilled in data visualization and statistical analysis, with a strong ability to communicate complex concepts to stakeholders.

SKILLS

Languages: Python, R, SQL

Frameworks: TensorFlow, Scikit-learn, Pandas

Cloud and tools: AWS, Google Cloud, Azure

Databases: SQLite, PostgreSQL

Practices: Machine Learning, Data Mining, Agile methodologies

EXPERIENCE

Data Scientist, Insight Analytics

May 2020 - Present

Bucharest, Romania

- Developed predictive models that increased sales forecast accuracy by 30%.
- Created interactive dashboards using Tableau, enhancing data accessibility for non-technical users.
- Collaborated with cross-functional teams to identify and solve data-driven business challenges.

Technologies: Python, Tableau, AWS

Junior Data Scientist, Data Vision

Jan 2018 - Apr 2020

Bucharest, Romania

- Assisted in building machine learning models for customer segmentation, increasing targeted marketing effectiveness.
- Performed data cleaning and preprocessing, improving data quality for analysis.
- Presented findings to stakeholders, simplifying complex statistical concepts for broader understanding.

Technologies: R, SQL, Scikit-learn

PROJECTS

Customer Churn Prediction

Developed a model to predict customer churn that decreased churn rate by 15% through targeted interventions. Technologies: Python, TensorFlow.

Sales Analysis Dashboard

Created an interactive dashboard for sales data visualization, resulting in an increase in strategic decision-making speed. Technologies: Tableau, AWS.

EDUCATION AND CERTIFICATIONS

MSc Data Science, Romanian Academy of Sciences (2018) - Graduated with Distinction

Certifications: Certified Data Scientist
