

Liam O'Keefe

DevOps Engineer

Dublin, Ireland | liam.okeefe@example.com | +353 7000 000005 | linkedin.com/in/liam-okeefe | github.com/liam-okeefe | liamokeefe.dev

PROFILE

Versatile DevOps Engineer with 5+ years of experience in automating and optimizing processes. Strong background in cloud computing and CI/CD practices, ensuring seamless software delivery.

SKILLS

Languages: Bash, Python, Go

Frameworks: Docker, Kubernetes, Ansible

Cloud and tools: AWS, Azure, Google Cloud

Databases: MySQL, Cassandra

Practices: Infrastructure as Code, Continuous Integration, Agile methodologies

EXPERIENCE

Senior DevOps Engineer, Future Tech Solutions

Mar 2020 - Present

Dublin, Ireland

- Automated deployment processes, reducing deployment times by 40%.
- Developed monitoring solutions that improved system reliability and performance.
- Collaborated with development teams to implement CI/CD pipelines, enhancing code quality.

Technologies: Docker, AWS, MySQL

DevOps Engineer, Cloud Innovators

Feb 2017 - Feb 2020

Dublin, Ireland

- Managed cloud infrastructure for various projects, ensuring optimal performance and security.
- Implemented configuration management using Ansible, streamlining environment setups.
- Provided support for production systems, swiftly resolving incidents to minimize downtime.

Technologies: Python, Azure, Cassandra

PROJECTS

Containerization Initiative

Led an initiative to containerize legacy applications, enhancing scalability and resource utilization. Technologies: Docker, Kubernetes.

Monitoring System Implementation

Developed a centralized monitoring system that identified performance bottlenecks and reduced incident response time by 30%. Technologies: AWS, Prometheus.

EDUCATION AND CERTIFICATIONS

BSc Computer Engineering, University College Dublin (2016) - Graduated with Honors

Certifications: Certified Kubernetes Administrator
