

Tariq Al-Mahdi

Data Engineer

Doha, Qatar | tariq.mahdi@example.com | +974 3000 0000 | linkedin.com/in/tariq-al-mahdi | github.com/tariqmahdi | tariqmahdi.dev

PROFILE

Detail-oriented Data Engineer with over 4 years of experience in designing data pipelines and managing data integration tasks. Proven track record in improving data processing efficiency and quality.

SKILLS

Languages: Python, SQL, Java

Frameworks: Apache Spark, Flask, Hibernate

Cloud and tools: GCP, AWS, Apache Airflow

Databases: PostgreSQL, Cassandra

Practices: Data architecture, ETL processes, Agile methodology

EXPERIENCE

Data Engineer, Data Solutions Inc.

Feb 2020 - Present

Doha, Qatar

- Designed and implemented ETL processes that improved data ingestion speed by 50%.
- Developed data models for analytical and operational use cases, enhancing decision-making processes.
- Collaborated with data scientists to optimize data pipelines for machine learning applications.

Technologies: Python, PostgreSQL, GCP

Junior Data Engineer, Analytics Co.

Jun 2018 - Jan 2020

Doha, Qatar

- Assisted in the migration of on-premise databases to cloud storage solutions.
- Implemented data validation scripts that ensured data integrity and accuracy.
- Worked closely with the BI team to provide data for reporting and analysis.

Technologies: SQL, AWS, Apache Spark

PROJECTS

Real-Time Analytics Dashboard

Developed a real-time analytics dashboard for monitoring business metrics, significantly improving response times for decision-making. Technologies: Flask, Apache Kafka.

Data Quality Checker

Created a data quality monitoring tool that automated the detection of anomalies in data sets, reducing manual oversight by 80%. Technologies: Python, Pandas.

EDUCATION AND CERTIFICATIONS

BSc Computer Science, University of Qatar (2018) - Specialized in data management and analytics.

Certifications: Google Cloud Data Engineer
