

Yusuf Al-Zamri

DevOps Engineer

Dubai, UAE | yusuf.alzamri@example.com | +971 50 000 0000 | linkedin.com/in/yusuf-alzamri | github.com/yusuf-alzamri | yusufalzamri.dev

PROFILE

Experienced DevOps Engineer with a solid background in system administration and software development. Expertise in optimizing deployment pipelines and enhancing system reliability through automation and monitoring.

SKILLS

Languages: Bash, Python, Go

Frameworks: Ansible, Kubernetes, Docker

Cloud and tools: AWS, Azure, Google Cloud

Databases: MySQL, Elasticsearch

Practices: Continuous integration, Infrastructure as code, Monitoring and logging

EXPERIENCE

DevOps Engineer, Cloud Services Corp.

Mar 2020 - Present

Dubai, UAE

- Automated deployment pipelines using Jenkins and Docker, reducing deployment time by 50%.
- Implemented monitoring solutions using Prometheus and Grafana, enhancing system visibility and uptime.
- Collaborated with development teams to integrate CI/CD practices, resulting in a 30% reduction in production issues.

Technologies: Docker, AWS, Ansible

System Administrator, Tech Solutions LLC

Jan 2017 - Feb 2020

Abu Dhabi, UAE

- Managed server environments and optimized resource usage, improving system performance by 20%.
- Conducted regular security audits and implemented necessary patches, enhancing system security.
- Provided support for application deployments and infrastructure scaling, facilitating a 15% increase in capacity.

Technologies: Linux, MySQL, Nagios

PROJECTS

Microservices Architecture Implementation

Led a project transitioning a monolithic application to microservices architecture, enhancing scalability and maintainability.

Technologies: Kubernetes, Docker.

Infrastructure Automation

Developed infrastructure automation scripts using Terraform, reducing provisioning time from hours to minutes. *Technologies: Terraform, AWS.*

EDUCATION AND CERTIFICATIONS

BSc in Information Technology, University of Dubai (2016)

Certifications: AWS Certified DevOps Engineer
