

Carlos de León

DevOps Engineer

Madrid, Spain | carlos.deleon@example.com | +34 600 000 0004 | linkedin.com/in/carlos-deleon | github.com/carlos-deleon | carlosdeleon.dev

PROFILE

Results-oriented DevOps Engineer with over 6 years of experience in cloud infrastructure, CI/CD pipelines, and automation. Proven track record in optimizing development workflows and improving deployment efficiency.

SKILLS

Languages: Bash, Python, Ruby

Frameworks: Ansible, Terraform, Kubernetes

Cloud and tools: AWS, GCP, Docker

Databases: PostgreSQL, MySQL

Practices: Continuous integration, Infrastructure as code, Monitoring and logging

EXPERIENCE

DevOps Engineer, Cloud Solutions Ltd

May 2021 - Present

Madrid, Spain

- Managed cloud infrastructure on AWS, reducing costs by 20% through resource optimization.
- Implemented CI/CD pipelines using Jenkins, enhancing deployment speed and reliability.
- Automated infrastructure provisioning using Terraform, decreasing setup time by 30%.

Technologies: AWS, Terraform, Docker

Systems Administrator, Tech Innovations S.A.

Apr 2018 - Apr 2021

Madrid, Spain

- Maintained Linux servers and ensured high availability of applications and services.
- Developed shell scripts to automate routine tasks, improving operational efficiency.
- Collaborated with developers to troubleshoot deployment issues and enhance infrastructure performance.

Technologies: Bash, AWS, MySQL

PROJECTS

Automated Deployment System

Designed a fully automated deployment system that reduced deployment time from hours to minutes, significantly improving productivity. Technologies: Jenkins, Docker, AWS.

Monitoring Dashboard

Created a monitoring dashboard to visualize system performance metrics, allowing for proactive issue resolution.

Technologies: Grafana, Prometheus, AWS.

EDUCATION AND CERTIFICATIONS

BSc in Information Technology, Universidad Complutense de Madrid (2017) - Specialized in cloud computing and systems administration.

Certifications: AWS Certified DevOps Engineer - Professional
