

Mikhail Petrov

DevOps Engineer

Moscow, Russia | mikhail.petrov@example.com | +7 495 123-4567 | linkedin.com/in/mikhail-petrov | github.com/mikhail-petrov | mikhail-petrov.dev

PROFILE

Dedicated DevOps Engineer with extensive experience in cloud infrastructure and automation. Committed to optimizing deployment processes and improving system reliability.

SKILLS

Languages: Bash, Python, Go

Frameworks: Kubernetes, Docker, Ansible

Cloud and tools: AWS, Azure, Terraform

Databases: PostgreSQL, Cassandra

Practices: Infrastructure as Code, Continuous Deployment, Monitoring and Logging

EXPERIENCE

DevOps Engineer, Cloud Solutions Corp.

Sep 2019 - Present

Moscow, Russia

- Automated deployment processes using Terraform, reducing deployment time by 60%.
- Implemented monitoring solutions to proactively address system issues, improving uptime by 30%.
- Collaborated with development teams to integrate CI/CD pipelines for streamlined workflows.

Technologies: AWS, Docker, Ansible

Junior DevOps Engineer, System Integrators LLC

Jun 2017 - Aug 2019

Kazan, Russia

- Assisted in managing cloud infrastructure on AWS, ensuring optimal performance and cost efficiency.
- Contributed to the transition of legacy systems to containerized environments, enhancing scalability.
- Supported application deployments and performed server maintenance tasks.

Technologies: Bash, Kubernetes, PostgreSQL

PROJECTS

Automated Deployment Pipeline

Designed and implemented an automated deployment pipeline that reduced release errors by 40% and improved team productivity. Technologies: Terraform, Jenkins.

Monitoring Dashboard

Created a centralized monitoring dashboard using Grafana, allowing for real-time insights into system performance. Technologies: Prometheus, Grafana.

EDUCATION AND CERTIFICATIONS

BSc in Information Technology, Moscow State University (2017) - Specialization in cloud computing.

Certifications: AWS Certified Solutions Architect - Professional, Docker Certified Associate
